

I graduated from Lynchburg College in 2016 with my Doctor of Physical Therapy. I have since worked toward certifications in vestibular and concussion therapy. I am a Site director and Junior Partner with Rehab Associates of Central Virginia. In my free time I enjoy spending time with my wife and 3 children. Love being outside, especially hiking along the Blue Ridge mountains.

I believe one of the challenges we face in the APTA is involvement, which is why I am running for the nominating committee. The nominating committee allows me to reach out to those who have potential but they may not realize it themselves. The more we advocate for ourselves, as a profession, the more we will be able to better treat our patients in the way they deserve.

I have already served 2 years in this position and look forward to having the opportunity of serving for more years.
