

Brian Maloney, PT, DPT

Bio

I joined the APTA academy of aquatics in 2019 and started volunteering in 2020. I have volunteered my time on the education committee helping to organize presentations and create content for the section. I also worked with the communications committee to let academy members know when new or updated content was produced. I have volunteered time at the Aquatic section's booth at CSM, as well as presented at CSM on spinal cord rehabilitation using aquatics in 2020. I have been a PT since graduating from Emory University in 2011. In 2016, I obtained my NCS. Currently, I am an assistant professor at the University of North Georgia and treat one day per week at the Shepherd Center.

Candidate Statement:

Working with the past 2 directors of education in the APTA academy of aquatic PT, I can say that I have learned a lot. We have made progress improving the educational resources available. If I am elected as 2nd vice president, I will work diligently to achieve the goals of the academy and continuing to build our foundation and resources we have created for the section.
